JL GENERATORS

Global Suppliers of Generators

Centurion Range 15kVA to 275kVA

International Rental Super Silenced Generator Sets

Rugged and reliable rental power **you can trust**

Centurion 15 - 275kVA

After 35 years support of the International Rental Industry and continual extensive design innovation following excellent customer feedback, JL Generators proudly introduce to you our best ever range for the worldwide Rental Power Generator Market.

Our Centurion Tier 3 Rental Range has been carefully consolidated in to one simple offering starting from 15kVA right through to 275kVA.

The core strength of the Centurion Range begins with the superb combination of the World-Class Perkins diesel engine and the tried and tested Stamford alternator, with some models additionally featuring our exclusive JL Generators switchless multi-voltage technology. There can be little doubt that reliability and flexibility will always be on your side.

After even a brief look through some of the innovative and effective features & benefits of the Centurion, you will soon agree there is no better solution for a harsh and increasingly demanding industry, known to us all as the worldwide Rental Power Generator Market.
